

CONTENTS

INTRODUCTION

INTRODUCTION	11
--------------------	----

CHAPTER ONE

THE CONNECTION: Infection Control and the Physical Environment	16
---	----

Infection Control Standards and the Infection Control Program

<u>GUIDELINES & REQUIREMENTS: Summary: The Joint Commission Infection Prevention and Control (IC) Standards; Summary: Joint Commission International (JCI) Prevention and Control of Infections (PCI) Standards</u>	18
---	----

- Planning for the Infection Control Program..... 17
- Implementation of the Infection Control Plan 17
- Evaluation and Improvement of the Infection Control Plan..... 20

Infection Control and Standards Related to the Physical Environment... 20

<u>GUIDELINES & REQUIREMENTS: Summary: The Joint Commission Environment of Care (EC) Standards Addressing Infection Control; Summary: Joint Commission International (JCI) Facility Management and Safety (FMS) Standards Addressing Infection Control</u>	21
--	----

- Standards for Demolition, Renovation, and/or Construction 20
- Standards for Medical Equipment and Utility Systems..... 22
- Standards for Hazardous Materials and Waste 22
- Standards for Emergency Power Sources 22
- Standards for a Safe and Functional Environment..... 22

Infection Control and Patient Safety Goals

- Patient Safety Goals and Evidence-Based Practices 23
- Patient Safety Goals, CLABSI, and CAUTI..... 23

Collaboration Among Infection Control and Environmental Professionals

- A Multidisciplinary Infection Control Team 23
- Typical Collaborative Relationships..... 23
- A Common Understanding: Infectious Organisms 24

<u>CASE STUDY: Infection Control Issues in Opioid Treatment Facilities</u>	25
--	----

- Environmental Tours for Infection Control..... 27
- Elements of the Environmental Tour..... 27

<u>TOOL: Infection Control Checklist for Environmental Tours</u>	29
--	----

Tracers for Infection Control..... 29

- Tracers to Evaluate and Assist 29
- Infection Control System Tracer 29

<u>TRACER: Sample Scenario: Infection Control System Tracer</u>	30
---	----

Conclusion

References..... 30

CHAPTER TWO

THE HUMAN ELEMENT: Staff and Infection Control Compliance	32
Collaboration Made Easier	33
• Collaboration with Leadership Support.....	33
• Collaboration Over Time and Across Teams	33
Human Factors and Hand Hygiene	33
• Human Factors Barriers to Hand Hygiene Practice	33
• Insufficient Time Spent in Hand Hygiene	34
• Delayed Feedback on Hand Hygiene.....	34
GUIDELINES & REQUIREMENTS: Comparison of US CDC and WHO Hand Hygiene Guidelines	35
• Overcoming the Human Factors Barriers to Hand Hygiene	39
• Target Solutions Tool® for Hand Hygiene.....	40
• Environmental Input to Hand Hygiene Approaches.....	40
TOOL: Checklist for Environmental-Related Hand Hygiene Elements...	41
GUIDELINES & REQUIREMENTS: Life Safety Standards for Alcohol-Based Hand Rub Dispensers.....	42
Human Error and Sharps Management	43
• Sharps Injury Prevention Program.....	43
CASE STUDY: Performance Initiative for Sharps Injury Prevention	44
• Logging and Reporting Sharps Injuries	46
TOOL: Sharps Injuries Log	47
• Safety Training for Sharps	46
• Sharps Disposal Containers	47
TOOL: Sharps Risk Assessment Questionnaire.....	48
GUIDELINES & REQUIREMENTS: US NIOSH Performance Criteria for Sharps Disposal Containers	50
Human Nature and Staff Training and Competency	49
• Multidisciplinary Team Approach.....	49
• Basic Education on Infection Control	49
• Collaborative Orientation on Infection Control.....	49
• Infection Control Training for Contract Staff.....	51
• Infection Control Competency.....	51
Conclusion	52
References	52

CHAPTER THREE

CONSTRUCTION PROJECTS: Infection Control Considerations	53
Infection Control Regulations for Construction Projects	54
• FGI <i>Guidelines</i>	54
• Other Infection Control and Construction Guidelines	54
<u>GUIDELINES & REQUIREMENTS: Sample of Key Changes in the 2014 FGI <i>Guidelines</i></u>	<u>55</u>
<u>RESOURCES: Online Guidelines for Infection Control and Construction</u>	<u>56</u>
Construction Project Collaboration	54
• Executive Project Team	54
• Expert Input	55
• Scope of Infection Control Practitioner Involvement.....	56
Design Elements for Infection Control	56
• Design Elements for Clinical and Ancillary Rooms.....	57
• Design Elements Posing Challenges for Infection Control.....	57
• Design Elements for Infection Control in Specific Areas	58
Sustainable Design and Infection Control	59
• Maximizing Environmental and Infection Control Goals	59
<u>RESOURCES: Online Information on Sustainable Design</u>	<u>60</u>
Infection Control Before Construction	59
• Risk Assessments	59
<u>TOOL: Infection Control Risk Assessment (ICRA) Matrix.....</u>	<u>61</u>
• Project Responsibility and Accountability	65
• Worker Education and Safety	65
• Safe Airflow	65
<u>SPECIFICATIONS & RECOMMENDATIONS: Engineered Specifications for Positive- and Negative-Pressure Rooms</u>	<u>67</u>
• Preconstruction Checklists for Infection Control.....	66
<u>TOOL: Infection Control Checklist for Construction Projects</u>	<u>68</u>
Infection Control During Construction	67
• Monitoring Construction Zone Materials.....	69
• Air and Water Samples	69
• Common Construction-Related Contaminants	70
<u>CASE STUDY: Air Quality During Construction</u>	<u>71</u>
Infection Control After Construction	70
• Postconstruction Agreements	70
• Pre-Occupancy Walk-Through	72
Conclusion	73
References	73

THREE

CHAPTER FOUR

MEDICAL EQUIPMENT: Reprocessing for Infection Control	74
A Systematic Approach to Reprocessing	75
• A Reprocessing Policy	75
RESOURCES: Organizations to Consult in Developing a Reprocessing Policy	76
• The Spaulding System	75
• Cleaning Medical/Surgical Items	76
• Disinfecting Medical/Surgical Items	77
SPECIFICATIONS & RECOMMENDATIONS: Spectrum of Activity Achieved by the Main Disinfectants	79
CASE STUDY: Infection Control Risks and Point-of-Care Testing.....	80
• Sterilizing Medical/Surgical Items	78
SPECIFICATIONS & RECOMMENDATIONS: Advantages and Disadvantages of Various Sterilization Methods	82
SPECIFICATIONS & RECOMMENDATIONS: Level of Reprocessing Required for Medical/Surgical Items	84
Monitoring Reprocessing	81
• Sterilizing: Mechanical Indicators	81
• Sterilizing: Chemical Indicators.....	83
• Sterilizing: Biological Indicators.....	83
SPECIFICATIONS & RECOMMENDATIONS: Protocol for Investigating Exposure Risk Due to Disinfection or Sterilization Failure.....	86
• Sterilizer Maintenance.....	85
• Monitoring for Policy Compliance.....	86
Central Processing	87
• Location and Areas of Central Processing.....	87
• Packaging and Inspecting	87
• Storage and Transport	87
• Surgical Services Department	88
• Central Processing Staff Education and Training	88
SPECIFICATIONS & RECOMMENDATIONS: AAMI Recommendations for Reprocessing Staff Competency.....	89
Biomedical Engineering	88
• Infection Risk in Biomedical Engineering	88
• Biomedical Staff Education and Training.....	88
AEM and Reprocessing Equipment	90
• AEM Restrictions.....	90
Collaboration in Reprocessing	90
Reprocessing Single-Use Devices	90
• Regulations Regarding SUDs.....	91
SPECIFICATIONS & RECOMMENDATIONS: SUDs and Reprocessing for TSE Precautions.....	93
Reprocessing Endoscopes	91
• Standards for Reprocessing Endoscopes.....	92
CASE STUDY: Verifying the Manual Cleaning Process of Flexible Endoscopes.....	95
• Addressing Endoscope Reprocessing Challenges	92
TOOL: Sample Checklist for Reprocessing Endoscopes.....	97
Conclusion	94
References	99

CHAPTER FIVE

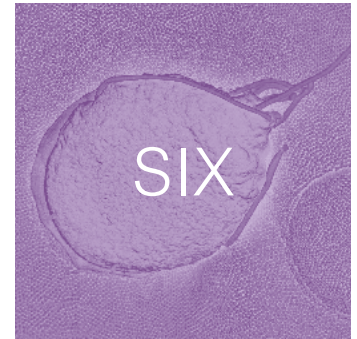

UTILITY SYSTEMS: Infection Control Concerns	100
Infection Control Regulations for Utility Systems	101
• Infection Control in the Utility Systems Plan	101
Infection Control and HVAC Systems	101
SPECIFICATIONS & RECOMMENDATIONS: HVAC and UVGI to Control Spread of Tuberculosis Infection	102
SPECIFICATIONS & RECOMMENDATIONS: Sick Building Syndrome	103
• HVAC Systems Variable: Pressure Relationships.....	102
SPECIFICATIONS & RECOMMENDATIONS: Areas with Special Ventilation Requirements.....	104
• HVAC Systems Variable: Air Change Rates.....	104
• HVAC Systems Variable: Filtration	105
Infection Control and HVAC System Maintenance	105
TOOL: Indoor Air-Quality Maintenance Checklist	106
• HVAC Systems Maintenance Tasks	105
• AEM for Utility Systems	105
Other Options: New Technologies and Sustainable Approaches	107
• Effective and Economical Future Options.....	107
• Environmentally Sustainable Options	107
Infection Control and Water Distribution Systems	108
EXAMPLES & ILLUSTRATIONS: Water-Linked Infection Outbreaks in Health Care Organizations	109
• Preventing Waterborne Pathogens from Colonizing	108
EXAMPLES & ILLUSTRATIONS: Interventions for Waterborne Pathogens in a Health Care Facility	110
• Disinfecting Water.....	112
Legionella	112
SPECIFICATIONS & RECOMMENDATIONS: What Every Clinician Needs to Know About Legionnaire’s Disease	113
• Surveillance for Legionnaire’s Disease Outbreaks	112
• Prevention Methods for Legionnaire’s Disease Outbreaks	114
• Routine Sampling for <i>Legionella</i>	115
• Tracing for <i>Legionella</i>	115
TRACER: Sample Scenario: Infection Control System Tracer	116
Conclusion	115
References	118

CHAPTER SIX

ENVIRONMENTAL SERVICES AND MEDICAL WASTE DISPOSAL:

Infection Control Issues	120
Housekeeping and Infection Control	121
<u>TOOL: Checklist for Housekeeping Infection Control</u>	122
• Basic Cleaning Methods and Materials	121
• Choosing the Right Cleaning Product	123
• Challenges of Cleaning Patient Rooms	123
<u>RESOURCES: US EPA Registered Disinfectants</u>	124
<u>CASE STUDY: Technology Solutions for Effective Cleaning</u>	125
• Protecting Housekeeping Staff	124
<u>ADVANTAGES & DISADVANTAGES: Glove Materials</u>	128
• Housekeeping Hot Spots	127
Laundry Operations and Infection Control	127
<u>SPECIFICATIONS & RECOMMENDATIONS: US CDC, NIOSH, and OSHA Laundry Practices</u>	129
• Laundry Sorting and Transporting	129
• Protecting Laundry Staff	130
• Policies and Procedures for the Laundry Operations	130
<u>GUIDELINES & REQUIREMENTS: Healthcare Laundry Accreditation Council: Sample Standards</u>	131
Regulated Medical Waste Disposal and Infection Control	130
• Categories of Regulated Medical Waste	132
• Treatment and Disposal of Regulated Medical Waste	132
<u>ADVANTAGES & DISADVANTAGES: Treatment Methods for Regulated Medical Waste</u>	133
• Fluid Waste Disposal	132
• Ebola-Contaminated Waste	134
<u>SPECIFICATIONS & RECOMMENDATIONS: Recommendations for Disposal of Ebola-Contaminated Waste</u>	135
Conclusion	136
References	136

CHAPTER SEVEN

EMERGENCY MANAGEMENT: Infection Control for Disasters	137
The EOP/EM Plan	138
• The Four Phases of Emergency Management	138
• Surge Capacity	138
• The Hazard Vulnerability Analysis	139
<u>TOOL: Hazard Vulnerability Analysis</u>	140
• Recommendations for Environmental Leaders	138
Infectious Patient Surges	141
• Communication and Infectious Patient Surges	141
<u>TOOL: Organizational Assessment for Influenza Preparedness</u>	143
• Managing a Surge of Infectious Patients	142
• Managing Epidemics	144
Environmental Considerations for Infectious Disease Outbreaks	144
• Isolation Rooms and Anterooms for Infectious Disease Outbreaks	144
• Use of PPE for Infectious Disease Outbreaks	145
• Cleaning for Infectious Disease Outbreaks	145
<u>CASE STUDY: Resuming Service After Blackwater Flooding</u>	146
• Infectious Waste from Infectious Disease Outbreaks	145
Decontamination	145
• Victim Decontamination Program	147
• Decontamination Incidents	147
• Triage for Decontamination	148
Decontamination Facilities	148
• Outdoor Decontamination Facilities	148
• Indoor Decontamination Facilities	149
• Additional Decontamination Facilities Issues	149
• Decontamination Team	150
Conclusion	150
References	151

CHAPTER EIGHT

PERFORMANCE IMPROVEMENT: Measuring Infection Control in the Physical Environment	152
A Multidisciplinary Team Approach	153
• Performance Improvement Team Tasks.....	153
• Team Communication and Collaboration.....	153
What to Measure	153
• Outcome Measures and Process Measures.....	154
CASE STUDY: Proactive Infection Control Based on Data.....	155
Collecting Data	157
• Environmental Rounds.....	157
• Employee Interviews.....	157
TOOL: Check Sheet: Six-Month Employee Injury Report.....	158
Intervention Responses and Follow-Up	157
Using Data Tools to Improve Infection Control	159
TOOL: Performance Improvement Tool Selection Matrix.....	159
• Data Displays: Performance Data on Competency Assessments.....	159
EXAMPLES & ILLUSTRATIONS: Sample Bar Chart: Posttest Scores for Infection Transmission Education.....	160
EXAMPLES & ILLUSTRATIONS: Sample Run Chart: Effectiveness of Training in Decontamination Procedures.....	161
• Using Data to Set Target Rates.....	162
US CDC Performance Measurement Recommendations	162
Conclusion	163
Reference	163
