APIC is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation (ANCC).

Course benefits:

- Practical and complex issues taught in everyday language
- Board certified (CIC[®]) instructors and small class sizes to ensure quality instruction
- A highly interactive learning format, with discussions, case studies, small group breakouts, and ample time for questions each day along with networking opportunities
- Learn the newest terminology, most current definitions, and regulatory issues of the day
- Gain the knowledge base and learn best practices required to create and implement an effective and compliant infection prevention program

Key course content:

- Roles of the IP
- Basic epidemiology of infectious diseases
- Introduction to microbiology
- Regulations and requirements
- Risk assessment
- Surveillance definitions: CAUTI, CLABSI, BSI, SIR, SSI, VAE
- Disinfection and sterilization
- Infection prevention in surgical settings
- Program management
- Outbreaks and investigations
- Device-related infections
- Data calculations and reporting
- Construction
