VISION
HEALTHCARE WITHOUT INFECTION

MISSION
CREATE A SAFER WORLD THROUGH PREVENTION OF INFECTION
5 STRATEGIC PRIORITIES

• PATIENT SAFETY
• IMPLEMENTATION SCIENCE
• PROFESSIONAL COMPETENCIES AND CERTIFICATION
• ADVOCACY
• DATA STANDARDIZATION
IPs: We ARE the Profession

Infection preventionists (IPs) are experts in identifying sources of infections and limiting their transmission in healthcare facilities.

How IPs spend their time:
- Prevention and control of transmission (46.6%)
- Identification of infection (44.2%)
- Management and communication (11.2%)
- Education and research (5.9%)
- Environment (4.8%)
- Cleaning and sterilization (4.7%)
- Employee and occupational health (2.0%)

The Association for Professionals in Infection Control and Epidemiology (APIC) conducted the MegaSurvey in 2015 to collect baseline data related to practice competencies, organizational structure and staffing, compensation, and the demographics of infection preventionists (IPs).

Preliminary results from the APIC MegaSurvey

2/3 of IPs work in acute care (hospital) facilities.

1/3 of IPs work in:
- Long-term care facilities,
- Outpatient settings,
- Ambulatory care,
- or other settings.

On average, certified IPs earn 25% more than non-certified IPs.

Average salary of an IP by geographic region:
- United States in order of highest to lowest:
  - North
  - New England
  - Midwest
  - South Atlantic
  - West North Central
  - Mountain
  - East North Central
  - West South Central
  - East South Central

Measurable, mission-focused goals

2020 Targets
6,750 facilities reached
7,595 with CIC credential
> 400 in research-focused series

Goal of courses and resources developed was exceeded by 30 percent

Impact:
• Better adherence
• Fewer infections
